Foreword

The Micro Enterprises Support Programme Trust (MESPT) is a local development organization founded in 2002 through a partnership between the Government of Kenya (GoK), the European Union (EU), and later, the Royal Danish Government. MESPT's main goal is to eradicate poverty by supporting the growth of micro-enterprises, including agricultural production, agribusiness, and afro-processing. This support aims to foster social, economic, and environmentally sustainable growth by increasing access to financial and business development services, creating jobs, and promoting sustainable micro-enterprises. Our vision is to build a more prosperous society, and our mission is to provide sustainable business development and financial services to smallholder farmers and agri-MSMEs in Kenya.

For over two decades, our team of professionals has been at the forefront of developing cost-effective and scalable solutions that promote financial inclusion and support the growth of sustainable agribusinesses. We accomplish this by providing tailored financial solutions that meet the specific needs of various agricultural value chains, delivered through a wholesale lending model to financial service providers such as SACCOs, MFIs, and Farmer Cooperatives. These providers, in turn, extend loans to smallholder farmers and micro agricultural enterprises.

Our approach emphasizes delivering integrated financial and business development services to smallholder farmers and MSMEs in Kenya, helping them access finance, boost agricultural productivity, improve afro-processing and connect to markets. Over the years, we have worked closely with county governments, development agencies, donors, and investors to strengthen business development capacities in the agricultural sector, using a unique tripartite model that connects farmers, SMEs, and financial institutions.

Cassava are among the key value chains that MESPT has supported over the years through various interventions to enhance commercialisation. MESPT appreciates the importance of documenting best practices for the banana value chain in facilitating effective delivery of training for farmers and Agri-preneurs. Therefore, MESPT has facilitated the development of this Training Manual alongside the banana handbook and other resource materials through the Green Employment in Agriculture Programme (GEAP) with support from DANIDA.

This guide is expected to enhance the effectiveness of training in good agricultural practices and banana commercialisation. I am optimistic that this manual will be helpful to partners in the banana value chain, including county governments. I am grateful to DANIDA for the continued support of MESPT programmes. I am also thankful to the banana value chain experts who spearheaded the compilation of this training manual.

Rebecca Amukhoye,

Chief Executive Officer, Micro-Enterprises Support Programme Trust

Preface

The Green Employment in Agriculture Programme is a 5 years' programme (2021 to 2025) funded by DANIDA and implemented by Micro-Enterprises Support Programme Trust (MESPT). GEAP seeks to contribute directly to Kenya's Vision 2030 and to one of Denmark-Kenya Strategic Framework on accelerated decent employment creation in MSMEs and improved competitiveness of targeted value chains in agriculture which will contribute to transforming the economy towards a greener and more inclusive growth.

GEAP programme targets 40,000 smallholder farmers and has been implemented in 12 counties namely, Kilifi, Kwale, Nakuru, Nyandarua, Siaya, Kisii, Kakamega, Bungoma, Trans Nzoia, Uasin Gishu, Makueni and Machakos. The programme facilitates increased commercialization, decent employment, and green transformation through targeted interventions in selected agriculture value chains that include, Cassava, Coconut, Dairy, Export Vegetables, Pineapple, Indigenous Poultry, Moringa, Pineapple, and Aquaculture.

MESPT through GEAP tasked multidisciplinary teams to develop resource materials tailored for extension service providers and farmers. This Cassava value chain trainers' guide is one of the series of the materials that were developed. MESPT further tasked value chain experts to develop a value chain manual for Cassava. This guide is to be used as an instructional tool for training on implementation of good agricultural practices, value addition and marketing for the value chain. Relevance of the content is based on needs identified among value chain players, actors and aligned to GEAP project objectives. The training content is drawn from the value chain manual and other relevant resource materials.

This trainers' guide consists of two sections. Section I comprises information about the value chain, guidelines and notes for facilitators while section II comprises of the training modules. The modules have a uniform outline that ensures every aspect of the manual is fully covered using approaches that the trainees can easily understand. The modules are progressively arranged to achieve a logical flow of the sessions. Recommended training durations are also provided.

A variety of delivery methods are outlined and where possible, demonstrations and practical work is incorporated. To maintain quality of training across various groups and settings, trainers' guidelines, program, training methods and training evaluation have been provided in the guide. It is advised that the trainers' guide should be used in conjunction with the respective value chain manual and other relevant reference materials. It is also recommended that participant hand outs and facts sheets are provided to trainers.

MESPT is grateful to the value chain experts who spearheaded the development and production of this trainers' guide. It is my hope that counties and other users will adopt and optimally use this resource so as to increase productivity and profitability while ensuring a greener and more inclusive growth.

Doreen Kinoti

Programme Manager, Green Employment in Agriculture Programme

Acknowledgements

The Green Employment in Agriculture Programme (GEAP) participating counties (Kilifi, Kwale, Nakuru, Nyandarua, Siaya, Kisii, Kakamega, Bungoma, Trans Nzoia, Uasin Gishu, Makueni and Machakos) are acknowledged for providing resource persons in compilation of the document. The technical support and expertise provided by Kenya Agricultural and Livestock Research Organisation in development of the document is appreciated. Thanks to the Royal Danish Government's Danish International Development Agency (DANIDA) for facilitating the development of this re-source material. Micro Enterprises Support Programme Trust (MESPT) is appreciated for co-ordinating the process of development and production of this document.

Cassava Value Chain Trainers' Guide

SECTION I

This section consists of six sub-sections which include an overview of the Cassava value chain in Kenya, Green growth opportunities in the cassava sub-sector, Objectives of the training, Content of the Training and Facilitators Guidelines.

1.0 OVERVIEW OF THE CASSAVA VALUE CHAIN IN KENYA

Cassava (*Manihot esculenta*) is an important food security and cash crop in Kenya with production levels estimated at 83,486 hectares, with annual production of 1,481,518 tons. The cassava value chain subsector employs 30% of the population indirectly and directly. Cassava produces more energy per unit area compared to most cereals and is the most resilient to climate change among major African crops (Jarvis et al., 2012). Cassava can be produced in arid and semi-arid (ASAL) areas, which constitute over 80% of Kenya. Cassava is mainly produced in western (60%), coastal (30%) and central (10%) regions of Kenya. Cassava is an ideal food security crop and a key industrial raw material because it can produce under adverse weather conditions, is available throughout the year, and is adaptable to various farming and food systems. There is also a great potential to reduce importation of wheat and maize by blending high-quality cassava flour in food and using it as an energy base in animal feeds.

Cassava is the third most important food root crop in Kenya and supports the livelihood of over 2.5 million people. It is a major food security and an income-generating crop for millions of smallholder farmers. Cassava is an important source of dietary energy, it's grown mainly for its tuberous roots as food and eaten either raw, boiled, fried or processed form. The roots are peeled, sundried and milled to flour for better storage. Flour is used make porridge, Ugali, local brews or mixed with wheat flour for home baking. Cassava leaves are traditionally used as vegetable in Coastal Kenya. Cassava is also used as animal feed. Cassava is used as raw material for; starch, brewing, pharmaceuticals, animal feed, textile and paper industries.

Cassava can therefore contribute significantly towards food and nutrition security, poverty alleviation, jobs creation, and industrial products. Despite its great potential in contributing to food, economic and nutritional security, small holder farmers, there remains untapped potential of the cassava value chain. This is attributed to several constraints namely: inadequate knowledge on good agricultural practices, limited access to quality cassava planting materials, erratic rainfall due to climate change, high cost of farm inputs, high incidence of pests and diseases, high postharvest losses, poor marketing infrastructure, weak farmer organization and limited value addition.

1.2 GREEN GROWTH OPPORTUNITIES IN THE CASSAVA VALUE CHAIN

Cassava is an exceptionally suitable crop for upscaling green technologies and building resilience to climate change among the smallholder growers. It is a crop which is resilient to dry conditions. Cassava does not require intensive inputs and therefore chemical load can be drastically reduced or avoided completely. Cassava-based mixed cropping systems can also improve overall income per unit area of land while promoting environmental conservation.

Green technologies such as such as solar drying in cassava value addition can be implemented with ease even in rural areas. Cassava seed multiplication and marketing also offers business and employment opportunities for youth women and the Vulnerable and Marginalized groups (VMGs).

I.3 OVERALL OBJECTIVES OF THE TRAINING

The objective of this training is to equip farmer trainers with knowledge and skills necessary to increase productivity through adoption of Good Agricultural Practices (GAP) and principles. Specifically, the objectives of this training are to:

1. Provide farmers trainers with relevant attitude, knowledge and skills in Cassava farming as a business and market assessment techniques for market led production
2. Enhance farmer trainers' knowledge and skills in Cassava GAP, including on-farm Cassava variety selection, establishment and management of fields
3. Equip farmers trainers' with knowledge and skills in post-harvest and value addition of Cassava

I.4 ORGANIZATION OF THE TRAINING CONTENT

The training content is organized into eight modules, which are targeted and orientated to ensure the adoption and upscaling of best practices in the Cassava value chain for improved productivity and competitiveness in a market driven production system. The purpose of these modules is to enhance the knowledge and capacities of trainers in understanding and disseminating best practices in the cassava value chain to the intended beneficiaries, who are primarily farmers.

A summary of the modules is presented in **Table I**.

Table 1: Summary of the eight training modules

No.	Module Name	Areas addressed	Expected Training Outcomes	Duration
1	Introduction	<ul style="list-style-type: none"> Understanding the cassava plant Suitable areas for cassava production in Kenya Agro-climatic requirements for cassava production Economic importance of cassava 	<ul style="list-style-type: none"> Better understanding of the cassava plant Proper site selection for cassava production Economic importance of cassava appreciated 	2 hours 30 minutes
3	Planting Materials and Propagation	<ul style="list-style-type: none"> Cassava varieties and variety selection Cassava propagation Cassava nursery management 	<ul style="list-style-type: none"> Awareness on improved Cassava varieties Knowledge on production of quality cassava planting materials enhanced Knowledge on cassava nursery management enhanced 	3 hours
5	Crop Management	<ul style="list-style-type: none"> Land preparation Planting Planting methods Good agronomic practices 	<ul style="list-style-type: none"> Improved understanding of suitable land preparation practices Planting and spacing recommendations appreciated Innovative climate smart agronomics practices for increased Cassava production appreciated 	3 hours 30 minutes

No.	Module Name	Areas addressed	Expected Training Outcomes	Duration
6	Pests and Disease Management	<ul style="list-style-type: none"> Cassava pests and how to control them Weed management in cassava Cassava diseases and how to control them 	<ul style="list-style-type: none"> Enhanced capacity to identify and control important cassava pests Enhanced knowledge on weed management in cassava Enhanced capacity to identify and control important cassava disease 	6 hours
7	Green Technologies and Mechanization	<ul style="list-style-type: none"> Green technologies in Cassava production Mechanization of cassava production 	<ul style="list-style-type: none"> Enhanced knowledge on green technologies Mechanized cassava production techniques appreciated 	2 hours 30 minutes
8	Cassava harvesting, post-harvest management and Value Addition	<ul style="list-style-type: none"> Maturity determination for various products Cassava harvesting techniques Post – harvest handling of cassava Value – added cassava products 	<ul style="list-style-type: none"> Proper maturity determination to reduce losses in quantity and quality of cassava appreciated Knowledge on proper harvesting techniques and storage facilities, hygiene and monitoring enhanced Knowledge on production of various value – added cassava products enhanced 	6 hours 30 minutes
13	Business opportunities in the value chain	<ul style="list-style-type: none"> Business opportunities in the Cassava value chain Investment Profiling for the Cassava Value Gross Margin Analysis 	<ul style="list-style-type: none"> Business opportunities in the cassava value chain explored Investment options in cassava value chain profiled Knowledge on gross margin analysis enhanced 	3 hours 20 minutes

No.	Module Name	Areas addressed	Expected Training Outcomes	Duration
	Gender and social inclusion			
	Evaluation of the training	Participants assessment of each training module	<ul style="list-style-type: none">• Effectiveness of training established• Areas for improvement identified	30 minutes
Total Duration				hours

*Training duration is inclusive of relevant practical and demonstration sessions. This training duration does not include break hours of mid-morning, lunch and afternoon breaks.

1.5 PARTNERS AND THEIR ROLES

The partners envisioned in this training include:

Core Trainers - The trainees drawn from KALRO, Universities, and Tertiary Institutions, State Department of Crop Development and Agricultural Research to facilitate initial Training and other stakeholders. They will also provide backstopping services for cascaded trainings.

County Government – The county Government will provide a team to be trained as (Training of Trainers) ToTs. This will include County technical staff, Service providers (SPs), lead farmers and other experts who will further cascade the training to farmer groups and other value chain players.

Lead Farmers – These are early adopters or role models at the community level. They are supposed to allow their farms to be used as learning sites.

1.6 FACILITATORS GUIDELINES

1.6.1 Preparation of Training Materials

The facilitators should familiarize themselves and internalize the guidelines provided in this guide prior to the training.

The training materials should be available before the actual training dates.

The stationery required should be available within the training venue before the training. These include name tags and writing materials

Visual aids like field equipment and tools should also be arranged in time before the sessions start.

Flip charts and good quality felt pens could be used interchangeably with projections.

There should be adequate copies of participants' handouts (one per participant) to be distributed at the end of each session or as may be suitable.

Copies of the modules can be distributed at the end of each module.

1.6.2 Preparation of Training Venue and Sites

The training venue will include the training room, field demonstration sites and market areas.

Training Room – Should have adequate space for participants seated in an arrangement that ensures unobstructed view of the front. A group of 20 to 30 participants is ideal. There should also be adequate desks and space for the trainers, their training materials and projector, flip charts holders.

Demonstration Site – Preferably should be within a walking distance.

Market Sites – these include retail outlets (kiosks, stalls, shops and supermarkets), whole sale and aggregation points and processing sites if any. The operators should be informed in advance about the visits. These should not be very far away, preferably less than 20 minutes' drive.

1.6.3 The Trainees & Trainer

The trainees will be drawn from public and private sector based on their roles in the value chain. The trainer should act more of a facilitator than a lecturer.

1.6.4 Training Program

The training program proposed consists of the actual training modules and the corresponding days and time allocation (**Annex I**).

1.6.5 Training Methods

The training methods proposed for each session are suitable for adult learners and appropriate for addressing knowledge, skills and attitudes of the participants. The choice of the methods has been informed by the competency issues being addressed, time available and experiences of the author of this guide. Depending on time available, the facilitator can modify these training methods but as a golden rule no presentation by the facilitator should take more than 30 minutes continuously; but should be separated by the other participatory training methods. Table 2 presents a list of available training methods.

Table 2: Description of Training methods

Training Method	Description of Method
Plenary presentations	Use of PowerPoint or flip charts and plenary discussions in situations where knowledge and opinion or consensus is required
Group exercises, buzz groups, visits and brainstorming sessions	To be considered where skills are an issue requiring sharing and trying
Role plays and problem-solving exercises	Plenary discussions have been considered as training methods where attitude is an issue
On-farm practical demonstration and exchange visits	To be considered where hands-on practical skills are acquired through practicals and demonstrations

1.6.6 Managing the Training Sessions

The logic of design and flow of each module is that the facilitator, paying attention to the proposed methods and session guidelines shall: (i) Introduce the module; (ii) Draw out the participant's expectations; (iii) Relate participants' expectations with module objectives or learning outcomes; (iv) Explore the concept and content, switching to different methods of delivery of the content (group exercise, brainstorming, excursions, plenary discussions) (v) Review the module at the end using participatory approaches like one participant reads one summary message and its application; and, (vi) Distribute the participants' handouts.

1.6.7 Evaluation of the Training

Half an hour has been allocated for planning for way forward and evaluation of the training on the last day of training. The individual trainees individually fill evaluation forms. The evaluation forms are then collected and analyzed by the facilitators.

Table 3: Sample Evaluation Form

Gender of respondent (Please tick): Male [<input type="checkbox"/>] Female [<input type="checkbox"/>] Please provide feedback on the topics by

Were the training materials (Power point, handouts) adequate? (Please tick) Yes [<input type="checkbox"/>] No [<input type="checkbox"/>] Give reasons: How are you intending to apply what you have learnt from this training? Please suggest areas of improvement			

1.6.8 Key references

Key references should be provided for each module plus a list of other relevant publications for reference.

Cassava reference material will consist of materials such as: Cassava production manuals/ guides; Pamphlets/brochures and Factsheets on specific topics

SECTION II: TRAINING MODULES

This part presents the content of 8 modules of training namely: Introduction, Planting Materials and Propagation, Crop Management, Pests and Disease Management, Green Technologies and Mechanization, Cassava harvesting, post-harvest management and Value Addition, Business opportunities in the value chain and Gender and social inclusion.

Outline of the modules

Each of the 8 modules consisting of 4 parts. These parts are:

Overview – Context and background to training needs, knowledge and skills GAP being addressed

Module learning outcomes – What trainees are expected to learn

Module summary – sequence of sessions, training methods, materials and duration. The module duration indicated is an estimation of the recommended minimum length of time the trainee is exposed to the training content

Facilitators guideline – detailed sessions, training methods, materials and session guides

MODULE 1: INTRODUCTION

1.1 Overview

Most of the Cassava production is rain fed. With the unpredictable rainfall patterns, prolonged droughts and increasing demand for food supply, the need for knowledge on the production niches and climatic conditions for Cassava production is therefore crucial for improved productivity and commercialization of the crop.

This module build skills of the trainees to understand the different suitable agro-climatic zones prescribing ideal altitudes, soils, temperature, and rainfall levels among other characteristics for Cassava production. While these agro-climatic factors are critical for growth and yield performance of Cassava, they also provide favorable conditions for pests, diseases, weeds and beneficial soil-borne microbes. It is therefore important for farmers to be trained on the suitable agro-ecological zones and innovative management practices for better Cassava performance and yields.

1.2 Module learning outcomes

By the end of the module, the following outcomes should be achieved:

1. Importance of Cassava in Kenya's economy explained and appreciated
2. Knowledge of altitudes and soil types/characteristics for Cassava production enhanced
3. Climatic conditions (temperatures, rainfall and humidity) required for Cassava production understood and applied
4. Specific county agro-ecological zones for Cassava production. explained and understood

I.3 Module Summary

Module I: Introduction			
Sessions	Training methods	Training materials	Time
I.3.1 Introductions and climate setting	<ul style="list-style-type: none"> • Preliminaries • Self-introduction • Setting Norms & rules • Plenary discussion • Group exercise 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector 	20 minutes

MODULE 2: PLANTING MATERIALS AND PROPAGATION

2.1. Introduction

This module is designed for training and exposing trainees to cassava varieties, propagation and nursery management. This module also exposes trainees to the improved Cassava varieties recommended for diverse uses and targeted production environments. There are many improved cassava recommended for cultivation in different agroecological zones.

Selecting the best Cassava variety is the most important decision made by a farmer. Planting a variety that is not suited for the available market and the particular production situation leads to lower profits or possibly crop failure. In addition to market acceptability, a variety must have acceptable yield, be adapted to the production area and have the highest level of preferred attributes. In order to optimize Cassava yields variety evaluation in the changing climate and farming environments is an important component for the selection of high yielding commercial varieties. The improved high yielding varieties are key to achievement of increased incomes as well as food and nutrition security. While introducing the improved varieties good agricultural practices will be mainstreamed in the process to ensure the technologies are environmentally sustainable and safe to consumers.

2.2. Module Learning Outcomes

By the end of the module, the following outcomes should be achieved:

1. Various improved Cassava varieties, their ecological areas of cultivation and their uses identified and compared
2. Cassava propagation and nursery management described

2.3 Module Summary

Module 2. Planting Materials and propagation			
Sessions	Training Methods	Training Materials	Time
2.3.1 Introduction, objectives and leveling of expectations 1.	<ul style="list-style-type: none"> Groups to bring out expectations Plenary presentation 	<ul style="list-style-type: none"> Module objectives Marker pens Flip charts Projector Laptop 	20 minutes

Module 2. Planting Materials and propagation			
Sessions	Training Methods	Training Materials	Time
2.3.2 Introduction to the various improved Cassava varieties, their ecological areas of cultivation and their attributes and uses.	<ul style="list-style-type: none"> • Group Exercises to identify local Cassava landraces and varieties • Plenary Presentations • Plenary discussion 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Manila papers 	30 minutes

2.4 Facilitator's Guidelines

2.4.1 Introduction and Levelling Expectations	Session guide
<p><i>The facilitator welcomes trainees to the module and introduces him/herself, stating profile and experience of working with farmers.</i></p> <p>Trainees' introductions and expectations</p> <p>The facilitator invites the trainees to state their expectations after brain storming in their respective groups</p> <p>Module Objectives</p> <p><i>The facilitator presents module's objectives.</i></p> <p>By the end of the module, the trainee should be able to:</p> <p>Appreciate the objectives of the training.</p>	<ul style="list-style-type: none"> • Summarize trainees' Expectations on a flipchart • Power Point presentation

2.4.2 Introduction to Cassava and the various improved Cassava varieties and their uses	Session guide
<p><i>(The facilitator describes the Cassava crop and guides the trainees in identifying the various Cassava improved varieties and their uses).</i></p> <ul style="list-style-type: none"> • Group exercise and discussion • Ask trainees highlight and describe some of the Cassava varieties they know. • Plenary Presentation • Improved Cassava varieties. • Categories of Cassava varieties and comparison of various hybrid varieties. • Show trainees the photographs of each variety and the full description and its uses. 	<ul style="list-style-type: none"> • Distribute participants' handouts • Group exercise • Plenary discussion
2.4.3 Recommended Cassava varieties for the target counties	Session guide
<p>Plenary Presentation</p> <p>Varieties for the target counties</p> <ul style="list-style-type: none"> • Cassava growing regions and the new regions which are being targeted for Cassava cultivation in Kenya. • Cassava varieties suited for each county • Climate conditions for target county (semi-arid, rain-fed and irrigated) <p>Group exercises</p> <p>Trainees discuss and come up with Cassava varieties in their county</p> <p>Field demonstration</p> <p><i>(Identify farmers' fields with various Cassava varieties).</i></p> <ul style="list-style-type: none"> • Visit the Cassava plots with the trainees and assist them identify and study the various varieties. • After the field visit facilitate them to recall what they learned and discuss on any issue that may arise. (can also use Cassava root samples/pictures for the various varieties) 	<ul style="list-style-type: none"> • Distribute participants' handouts. • Powerpoint presentation • Group exercise • Field demonstration

2.4.4 .Instructions on seed package interpreted and applied	Session guide
<p>Plenary Presentation</p> <p>Certified seed sources for Cassava identified and adopted.</p> <p>Information on seed and cuttings understood in preferred variety identified.</p> <p>Circulate samples of certified Cassava cuttings</p> <p>Identify key information on Cassava cuttings provided</p>	<ul style="list-style-type: none">• Distribute Participants' handouts• Group exercise• Plenary discussion

MODULE 3: CROP MANAGEMENT

3.1 Introduction

The low yields realized in Cassava production by farmers is as a result of inadequate adoption of the improved crop management practices developed by agricultural researchers. Some of the improved agronomic practices available for these farmers include; timely land preparation, use of recommended fertilizer types, correct plant spacing, knowledge of physiological maturity indices and how to improve on harvesting techniques to avoid losses

In order to optimize productivity of Cassava, farmers need to adopt specific agronomic packages, without which the yield potential of improved varieties cannot be achieved. In addition, the weather vagaries occasioned by climate change effects make it necessary to incorporate adaptation or mitigation measures which can enable Cassava farmers increase its productivity. In this respect, climate smart agronomic practices come to the fore. Therefore, there is need to equip farmer facilitators with skills and knowledge that will enable them train farmers on innovative climate smart Cassava agronomic practices that include; seed selection techniques, and disease and pest management strategies for increased production.

3.2 Module learning outcomes

By the end of the module, the following should be achieved:

1. Agronomic practices for Cassava production described and explained.
2. Region specific agronomic practices for Cassava production optimization outlined.
3. Appropriate inputs and their correct application rates for Cassava production described.
4. Timing for operations or inputs application in Cassava production described and explained.

3.3 Module Summary

Module 3: Cassava agronomic practices			
Sessions	Training methods	Training materials	Time
3.3.1 Introductions and climate setting, objectives and expectations	<ul style="list-style-type: none">• Self-introduction• Setting Norms & rules• Plenary Presentation• Plenary discussion• Group exercise	<ul style="list-style-type: none">• Flips charts• Felt pens• Laptop• Projector	20 minutes
3.3.2 Agronomic practices for Cassava production	<ul style="list-style-type: none">• Presentations• Group exercise (Groups tour nearby farm for layout demonstration)• Plenary discussions (From the farm visit)	<ul style="list-style-type: none">• Flips charts• Felt pens• Laptop• Projector• Participants' handouts	1 hour 30 minutes

3.3.3. Site selection, Land Preparation, seed selection, planting, water requirement, pest management, weed management and crop rotation	<ul style="list-style-type: none"> • Practical exercise (groups tour nearby farm for layout demonstration) • Presentations 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Participants' handouts 	30 minutes
3.3.4 Appropriate inputs and their recommended application rates for optimum production of Cassava	<ul style="list-style-type: none"> • Presentations • Group exercise (trainees enlist inputs and application rates for different counties) • Plenary discussions (share group work results) 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Participants' handouts 	40 minutes
3.3.5 Module review and discussion	<ul style="list-style-type: none"> • Discussion/conclusion and way forward 	<ul style="list-style-type: none"> • Flip charts • Felt pens • Laptop • Projector 	30 minutes
Total			3 hours 30 minutes

3.4 Guidelines for Facilitators

Module 3: Agronomic Practices for Cassava		
3.4.1. Introductions, climate setting	Session guide	
<p>Preliminaries</p> <p><i>The facilitator welcomes trainees to the module and thereafter invites them to introduce themselves and state their expectations</i></p> <p>Expectations</p> <p>The trainees form groups (e.g., county based) and list expectations from the module</p> <p><i>The facilitator presents the module objectives.</i></p> <p>Objectives</p> <p>By the end of the training module, the trainee should be able to:</p> <ul style="list-style-type: none"> • Explain and describe agronomic practices for Cassava production. • Describe appropriate inputs and their correct application rates for Cassava production. • Outline region specific Cassava production agronomic practices. • Specify the correct timing for all operations including application of inputs in Cassava production. 	<ul style="list-style-type: none"> • Summarize the trainees expectations • Powerpoint presentations • Group exercise (listing and presenting expectations). • Expectations lists kept for later reviewing compliancy 	

Module 3: Agronomic Practices for Cassava		
3.4.1. Introductions, climate setting	Session guide	
3.4.2. Agronomic practices for Cassava production		
<p>Plenary Presentation</p> <p>The facilitator presents critical factors on:</p> <ul style="list-style-type: none"> • Factors for selecting Cassava production as an enterprise • Climate smart land preparation practices • Climate smart planting • Weed control • Pests and disease control • Cropping systems • Spacing (inter-and intra-row spacing) • Conservation agriculture principles/benefits <p>Practical exercise</p> <p>Guided groups tours to model farms to observe various planting and management techniques</p> <p>Plenary discussion</p> <p>Questions/answers and comments</p>	<ul style="list-style-type: none"> • Power point Presentation • Plenary discussion • Distribute participants' handouts/training materials • Practical exercise 	

Module 3: Agronomic Practices for Cassava		
3.4.1. Introductions, climate setting	Session guide	
3.4.3. Appropriate inputs for the optimal production of Cassava and their correct/ recommended application rates	Session guide	
<p>Group exercise</p> <ul style="list-style-type: none"> • The facilitator guides trainees to list or/ and present the required inputs for use in Cassava production • The trainees get into county groups to provide lists of Cassava inputs and their application rates as practiced by farmers. • The groups present their results in the plenary - opening up for questions, answers and discussion. <p>Plenary presentation and plenary discussion</p> <p>(The recommended Cassava inputs (seed, cuttings, fertilizers, manures, among others), their application rates and appropriate time of application for optimal yields</p>	<ul style="list-style-type: none"> • Power point Presentation • Distribute participants' handouts • Groups exercise • Plenary discussion 	
3.4.3. Appropriate inputs for the optimal production of Cassava and their correct/ recommended application rates	Session guide	
<p>Group exercise</p> <ul style="list-style-type: none"> • The facilitator guides trainees to list or/ and present the required inputs for use in Cassava production <p>The trainees get into county groups to provide lists of Cassava inputs and their application rates as practiced by farmers.</p> <p>The groups present their results in the plenary - opening up for questions, answers and discussion.</p> <p>Plenary presentation and plenary discussion</p> <p>The recommended Cassava inputs (seeds, cuttings, fertilizers, manures, among others.), their rates and their time of application for optimal yields</p>	<ul style="list-style-type: none"> • Power point Presentation • Distribute participants' handouts • Groups exercise • Plenary discussion 	

Module 3: Agronomic Practices for Cassava	
3.4.1. Introductions, climate setting	Session guide
3.4.4. Module review	Session guide
<p><i>(The facilitator leads the trainees in reviewing the module)</i></p> <p>Summary of the main points from the training</p> <ul style="list-style-type: none"> Objectives and expectations (review done on basis of the objectives and expectations listed earlier) <i>Trainees to randomly indicate new sets of skills and knowledge learnt from the module. The results are recorded per county presented</i> Randomly (average of 10 cases) trainees identify key issues for the way forward issues. 	<ul style="list-style-type: none"> Participants' handouts Summarize the main points of the module on a flip chart and display

MODULE 4: PESTS AND DISEASE MANAGEMENT

4.1 Introduction

Cassava production is often constrained by damage caused by a range of insects, diseases and weeds. Dependence on local varieties which are susceptible to cassava brown streak disease (CBSD), and cassava mosaic disease is a major drawback. Insect pests such as mealy bugs pose a great challenge to cassava productivity. Further, an acute shortage of knowledge among Cassava farmers on the recommended crop health management options gets farmers frustrated and most of them may abandon the crop if timely interventions are not prioritized.

Weeds present competition for growth and development resources needed by the Cassava crop i.e. moisture, nutrients, light and space. This has significantly reduced productivity and profitability of Cassava over time. This module is therefore meant to help the trainees understand the ecology, impact and recommended management practices for diseases, pests and weeds to reduce production costs and improve Cassava yields.

4.2 Module Learning Outcomes

By the end of the module, the following outcomes should be achieved:

1. Major pests, diseases and weeds identified.
2. Integrated pest, disease and weed management in Cassava described and explained.
3. Knowledge on major diseases, their development, economic losses and their control.
4. Integrated Disease Management approaches and scouting for threshold determination.
5. Integrated weed management strategies for Cassava.
6. Safe use of agro-chemicals (pesticides, fungicides and herbicides) explained and appreciated.

4.3 Module Summary

Module 4: Pest and Disease Management			
Sessions	Training methods	Training materials	Time
4.3.1 Introduction, objectives and expectations	<ul style="list-style-type: none">• Self-introductions• Group exercise• Plenary presentation• Plenary discussion	<ul style="list-style-type: none">• Flips charts• Marker pens• Laptop• Projector	30 minutes

4.3.6 Integrated weed management (Major weeds of Cassava)	<ul style="list-style-type: none"> • Plenary Presentation • Plenary discussion • Field demonstration 	<ul style="list-style-type: none"> • Flip charts • Marker pens • Projector • Laptop • Participants' handouts 	1 hour
4.3.7 Safe use of agro-chemicals and update source for registered agro-chemicals (PCPB registered products)	<ul style="list-style-type: none"> • Presentations • Practical exercise • Plenary discussion 	<ul style="list-style-type: none"> • Projector • Laptop • Flip charts • Marker pens • Participants' handouts 	30minutes
4.3.8 Module Review	<ul style="list-style-type: none"> • Discussion/ Recap of the module • Take away messages 	<ul style="list-style-type: none"> • Flip charts • Marker pens • Participants' handouts 	30 minutes
Total			6 hours

4.4 Facilitator's Guidelines

Module 4: Pest and Disease Management	
4.4.1 Introduction and levelling of expectations and objectives	Session guide
<p>Introduction (The facilitator welcomes trainees to the module and thereafter invites them to introduce themselves and state their expectations)</p> <p>Module Objectives (The facilitator presents modules objectives)</p> <p>By the end of the module, the trainee should be able to:</p> <p>Identify major pests, diseases and weeds.</p> <p>Describe and explain integrated pest, disease and weed management in Cassava.</p> <p>Explain safe use of agro-chemicals (pesticides, fungicides and herbicides).</p>	<ul style="list-style-type: none"> • Summarize trainees' "Expectations" • Powerpoint presentation • Participants' handouts
4.4.2 Major Cassava pests that cause economic losses and their control methods; emerging/migratory pests	Session guide
<p>(The facilitator makes a presentation on the common Cassava pests that are of economic importance)</p> <p>Group work</p> <ul style="list-style-type: none"> • Trainees to share Cassava pest information from their respective Counties • Plenary Presentation • Names of pests and their descriptions • Symptoms of their infestation/type of damage • Data on economic significance of the common Cassava pests • Practical exercise • Identification of Cassava pests from provided specimens <p>Discussion</p> <ul style="list-style-type: none"> • Let the trainees recall what they learned and discuss any issue that may arise 	<ul style="list-style-type: none"> • Power point presentation • Group exercise • Practical exercise • Participants' handouts

Module 4: Pest and Disease Management	
4.4.1 Introduction and levelling of expectations and objectives	Session guide
4.4.3. Sustainable Integrated Pest Management (IPM) practices in Cassava; scouting and threshold determination	Session guide
<ul style="list-style-type: none"> • Plenary Presentation • IPM principles; how to implement them with a focus on cultural, physical, biological and chemical pest management options. • Critical considerations for proper scouting • Threshold determination and when to implement control measures • An overview on the safe use of agro-chemicals (demonstration on how to select most suitable pesticides, for the management of pests in Cassava). • Discussion • Let the trainees recall what they learned and seek clarification on the principles of sustainable IPM options 	<ul style="list-style-type: none"> • Power point presentation • Participants' handouts
4.4.4 Major Cassava diseases that cause economic losses, conditions that favour their development and their control methods	Session guide
<ul style="list-style-type: none"> • Group work • Determination of Cassava diseases in specific Counties • Plenary Presentation • Presentations on Cassava diseases and conditions that favor their development • Practical Exercise • Identification of major disease species causing economic damage based on samples presented 	<ul style="list-style-type: none"> • Power point presentation • Participants' handouts • Disease identification guidelines • Practical exercise
4.4.5 Sustainable Integrated Diseases Management (IDM); scouting and threshold determination	Session guide
<ul style="list-style-type: none"> • Plenary presentation • Critical considerations for scouting and when to implement Cassava disease control measures • Presentation on Integrated Disease Management (IDM) in Cassava • An overview on the safe use of recommended agro-chemicals (demonstration on how to select most suitable fungicides for the management of major Cassava diseases). • Field visit • Visit to a nearby Cassava field for collection and identification of diseased Cassava samples 	<ul style="list-style-type: none"> • Power Point presentation • Participants' handouts • Disease management guidelines • Field demonstration

Module 4: Pest and Disease Management	
4.4.1 Introduction and levelling of expectations and objectives	Session guide
4.4.6 Integrated weed management (Major weeds of Cassava)	Session guide
<ul style="list-style-type: none"> • Plenary presentation • Identification of weeds • Major types of weed in the Cassava field • Integrated Weed control measured • Plenary discussion • Integrated weed management 	<ul style="list-style-type: none"> • Power point presentation • Participants' handouts • Plenary discussion
4.4.7 Safe Use of agro-chemicals and sources of registered chemicals (PCPB registered products)	Session guide
<ul style="list-style-type: none"> • Practical • Trainees go into their groups and discuss: • Ways used by farmers in mixing of pesticides/ Indigenous Technical Knowledge (ITK) products; and their consideration on safe use of pesticides • Representative group leaders give presentation on findings of the discussion • Plenary presentation • Facilitator makes presentation on: • Safe use of pesticides • Let the trainees ask questions on any of the covered topical issues and critical areas to share with farmers on safe use of pesticides 	<ul style="list-style-type: none"> • Power point presentation by facilitator and representative group leaders • Demonstration of proper use of knap sack sprayer, protective gear and calibration of pesticides, sourcing for registered pesticide information online: on PCPB website • Distribute participants hand-outs (brochures, leaflets and manuals) • Pest, disease and weed management guidelines

Module 4: Pest and Disease Management	
4.4.1 Introduction and levelling of expectations and objectives	Session guide
4.4.8 Module review	Session guide
<ul style="list-style-type: none"> • <i>(The facilitator leads the trainees in reviewing the module)</i> • Summarize the main points of the training: The facilitator should review the following main points about climatic conditions suitable for Cassava production: • Major pests of Cassava and their economic impacts on Cassava production. • Integrated Pest Management (IPM) options for Cassava • Major diseases of Cassava and their economic impact on Cassava production. • Integrated Disease Management (IDM) options for Cassava • Major weeds of Cassava and their economic impacts on Cassava production. • Integrated Weed Management (IWM) options for Cassava • (Discuss with trainees about new things learnt from this Module. What are some of the issues that need clarification)? 	<ul style="list-style-type: none"> • The last participants' handouts • Summarize the main points from the module on a flip chart and display

MODULE 5: GREENTECHNOLOGIES AND MECHANIZATION

5.1 Introduction to the module

Agricultural mechanization enhances production, productivity and profitability in agriculture by achieving timeliness of farm operations. It comes along with precision in metering and placement of inputs, reducing susceptibility to input losses, increasing utilization efficiency of costly inputs (seed, chemical, fertilizer, irrigation, water, etc.), reducing unit cost of production, enhancing profitability and competitiveness in the cost of operation. It also benefits conservation of agricultural produce and by-products from qualitative and quantitative damages; enables value addition and establishment of agro processing enterprises for additional income and employment generation from farm produce. Agricultural mechanization is one of the important inputs that has potential to revolutionize Cassava farming in Kenya especially when applied to planting, weeding, harvesting and post-harvest activities.

5.2 Module learning outcomes

By the end of the module section the following outcomes should be achieved:

1. Climate smart tillage options identified and explained
2. Bush clearing machines demonstrated
3. Use of pest control implements and tools demonstrated
4. Processing machines and equipment demonstrated

5.3 Module Summary

Module 5. Green Technologies and Mechanization

Module 5:Green Technologies and Mechanization	
5.4.7 Module review	Session guide
<ul style="list-style-type: none"> • The facilitator leads the trainees in reviewing the module) • Summarize the main points of the training and together with the participants review the main points: • Demonstrate • Climate smart tillage options identified and explained • Bush clearing machines demonstrated • Use of pest control implements and tools demonstrated • Cassava processing machines demonstrated • (Discuss with trainees about new things learnt from this Module.What are some of the problems and issues that they have become more aware of in the module?) 	<ul style="list-style-type: none"> • The last participants' handouts • Summarize the main points from the module on a flip chart and display

MODULE 6: CASSAVA HARVEST, POST HARVEST MANAGEMENT AND CASSAVA VALUE ADDITION

6.1 Introduction

Cassava is an important cash crop in Kenya. Cassava processing creates cottage industries for income generation. This module introduces farmer trainers to the importance of cassava in addressing food and nutrition security at the household, community and industrial levels. The module also covers the various cassava value added products, constraints in value addition and their suggested solutions. It is expected that the processing and value addition methods provided will enhance production and consumption of this crop towards food and nutrition security.

6.2 Module Learning Outcomes

By the end of the module, the following outcomes should be achieved:

1. Role of cassava as a food security crop explained.
2. Nutritional composition of cassava, health benefits, food security and income described.
3. Constraints in value addition and utilization of cassava, and suggest solutions identified
4. Cassava-based value added products identified and explained.

6.3 Module Summary

Module 6. Cassava Harvest, Post-Harvest Management and Value Addition			
Sessions	Training Methods	Training Materials	Time
6.3.1. Introduction, Objectives Expectations	<ul style="list-style-type: none">• Personal introduction• Group work• Plenary Presentation	<ul style="list-style-type: none">• Flip charts• Projector• Laptop	30 minutes
6.3.2 Role of cassava as a food and nutrition security crop	<ul style="list-style-type: none">• Power point Presentation• Group exercise• Plenary Presentation	<ul style="list-style-type: none">• Flip charts• Felt pens• Projector• laptop• Participants' hand-outs	30 minutes

MODULE 7: BUSINESS OPPORTUNITIES IN THE VALUE CHAIN

7.1 Introduction

Cassava is mainly produced in Western and coast regions. Markets and marketing of Cassava is a major issue of concern to small scale farmers and other actors in the value chain in Kenya, particularly inconsistency in supplying sufficient volumes required for trade, seasonal supply and price fluctuations. The low production/volumes and bulkiness of the produce also limit farmers to the local markets, where demand is low and hence prices. To strengthen the Cassava value chain, it is important to equip farmer facilitators with the skills and knowledge on Cassava farming business and marketing strategies. This module is designed to build skills of trainees in Cassava farming business and marketing in Kenya.

7.2 Module Learning Outcomes

By the end of this module, the following training outcomes should be achieved:

1. The business concept and emerging farming business models explained and appreciated.
2. Planning a farm business using Strength, weaknesses, Opportunities and Threats (SWOT) Analysis, farm budgeting and business plan described.
3. Tools for implementing a farm business, record keeping, break-even, gross-margin and entrepreneurship explained and described.
4. Various marketing approaches of Cassava identified.
5. Determination of Profitability (Gross margin analysis) described

7.3 Module Summary

Module 7. Business Opportunities in the Cassava Value Chain			
Sessions	Training Methods	Training Materials	Time
7.3.1. Models for market-oriented production of Cassava (Levelling of participants' expectations about the module and objectives)	<ul style="list-style-type: none"> • Introduction • Plenary discussion 	<ul style="list-style-type: none"> • Projector • Laptop • Flip charts • Marker pens • Masking tapes/flip chart holders 	20 minutes

Module 7. Business Opportunities in the Cassava Value Chain			
Sessions	Training Methods	Training Materials	Time
<p>7.3.2. Developing a Business Plan for Cassava farm Business</p> <p>i) Business concept and emerging and farming business models)</p> <p>ii) Planning a farm business: SWOT Analysis, farm budgeting and business plan</p>	<ul style="list-style-type: none"> • Plenary presentation • Plenary discussion • Group exercise 	<ul style="list-style-type: none"> • Projector • Laptop • Flip charts • Marker pens • Masking tapes/flip chart holders 	1 hour
7.3.3. Marketing as a group - collective marketing	<ul style="list-style-type: none"> • Presentation and • Plenary discussions • Role play exercise 	<ul style="list-style-type: none"> • Projector • Laptop • Flip charts • Marker pens • Masking tapes/flip chart holders 	30 minutes

<i>(The facilitator leads the trainees in reviewing the module. Conclude by thanking the trainees)</i> Plenary Presentation <i>Summarize the main points of the training</i>	<ul style="list-style-type: none">• Plenary presentation• Summary of the main points from the Module.

CHAPTER 8: GENDER EQUALITY , HUMAN RIGHTS AND SOCIAL INCLUSION

8.1 Introduction

Gender equality, human rights, and social inclusion are essential for achieving peaceful societies, full human potential, and sustainable development. Empowering women leads to productivity and economic growth. Advancing gender equality is critical for reducing poverty and promoting health, education, and well-being. Human rights, including freedom from violence and socio-economic equality, should be enjoyed by all people. Studies have shown that many right holders especially those in rural areas are not aware of their rights and the need to demand the same from duty bearers who include the state and non-state actors and even within households.

The achievement of the 17 UN Sustainable Development Goals(SDG) is dependent on the operationalization and implementation of gender equality and women empowerment strategies, Human Rights Based Approaches(HRBA) and social inclusion is guided on the principle of Leave no one Behind. Restrictive gender roles and social norms a lived reality in most of the rural smallholder farms continue to drag development behind. While men and women continue to perform these roles as is, many of them lack awareness of how some of these community sanctioned roles continue to limit their progress in live especially among in creating wealth out of the agricultural value chains.

Intentionality in creating awareness among right holders to claim their rights , capacity building the duty bearers to meet the claims and ensuring those likely to be left behind like people living with disabilities (PWDs), the marginalized and the minorities among others are included would greatly contribute to common good, dignified lives and sustainable development.

This facilitator guide provides a lay out on how to train on the issues gender equality, human rights and social inclusion.

8.1 Chapter Summary

Chapter 8.0: Gender equality, human Rights and social inclusion			
Sessions	Training methods	Training materials	Time
8.1 Introductions and climate setting, objectives and expectations	<ul style="list-style-type: none"> Self-introduction Setting Norms & rules Plenary Presentation Plenary discussion Group exercise 	<ul style="list-style-type: none"> Flips charts Felt pens Laptop Projector 	20 minutes

8.2 Guidelines for Facilitators

Chapter 8: Gender Equality, Human Rights and social inclusion		
8.1. Introductions, climate setting	Session guide	
<p>Preliminaries</p> <p><i>The facilitator welcomes trainees to the Chapter and thereafter invites them to introduce themselves and state their expectations</i></p> <p>Expectations</p> <p>The trainees form groups (e.g., county based) and list expectations from the module</p> <p><i>The facilitator presents the chapter objectives.</i></p> <p>Objectives</p> <p>By the end of the training Chapter, the trainee should be able to:</p> <ul style="list-style-type: none"> Explain and describe what gender and gender mainstreaming is with practical examples Describe appropriate steps to take in operationalizing the PANT principles Describe and list those likely to be excluded from the value chains. Specify the correct actions to take to address the root causes of exclusion and how they will be monitored. 	<ul style="list-style-type: none"> Summarize the trainees expectations PowerPoint presentations Group exercise (listing and presenting expectations). Expectations lists kept for later reviewing compliance 	

8.1.1 Gender equality definition of concepts	
<p>Plenary Presentation</p> <p>The facilitator introduces the topic of background information and gender equality</p> <ul style="list-style-type: none"> • Individuals reflect on their understanding of various concept sex, gender, equity, equality, diversity, gender mainstreaming among others • Presentations are made to dispel biases and stereotypes • Plenary discussions <p>Plenary discussion</p> <p>Questions/answers and comments</p>	<ul style="list-style-type: none"> • Plenary discussion • Distribute participants' handouts/ training materials • PowerPoint Presentation • Practical exercise
8.1.2 The business case for gender mainstreaming	Session guide
<p>Group exercise</p> <ul style="list-style-type: none"> • The facilitator guides trainees to visit successful Agri-business where both a model couple) • The group reflects on their findings • A PowerPoint presentation. 	<ul style="list-style-type: none"> • PowerPoint Presentation • Distribute participants' handouts • Groups exercise • Plenary discussion
8.1.3 Steps to mainstream gender	Session guide
<p>Group exercise : the facilitator conducts</p> <ol style="list-style-type: none"> 1. Practical session on gender roles(daily calendar)- Women and men separately then present in plenary for further reflection 2. Practical session on Access, control, and ownership-separately then present in plenary 3. Social norms in the community about men and women-separate norms then present in plenary 4. Barriers and enablers to women and youth participation in the agricultural value chains and how they will be addressed by the group. 5. Presentations Plenary presentation and plenary discussion 6. PowerPoint presentation <p>The facilitator leads the trainees into</p> <ol style="list-style-type: none"> 1. Individual visioning for a certain period future then in pairs share, prioritize and work on one priority area identify opportunities ,challenges and targets and activities 2. Plan on next steps 	<ul style="list-style-type: none"> • PowerPoint Presentation • Distribute participants' handouts • Groups exercise • Plenary discussion

8.2 Human rights	
<p>The facilitator leads the trainees into; Individual reflections on their human rights, those who have duty to address these rights</p> <ul style="list-style-type: none"> • Buzz groups to identify issues of human rights • Plenary Presentations • PowerPoint presentations 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Participants' handouts
8.2.1 HRBA-PANT Principles	
<p>The facilitator lead the team on the PANT principles</p> <ul style="list-style-type: none"> • Group work • Presentations • PowerPoint presentations 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Participants' handouts
Social Inclusions	
<p>The facilitator leads the trainee into group discussions on who is likely to be left behind in the value chain</p> <ul style="list-style-type: none"> • Identification <p>Who is excluded? Are some groups less likely to benefit from a Program/project because of their identity?</p> <ul style="list-style-type: none"> • Analysis <p>How and why is the particular group (or groups) excluded? What drives the exclusion?</p> <ul style="list-style-type: none"> • Actions <p>What actions can the groups/ farmers take to ensure there is social inclusion</p> <ul style="list-style-type: none"> • Monitoring <p>How would they know if they have made progress in ensuring social inclusion?</p> <ul style="list-style-type: none"> • Action plan for mainstreaming Gender Youth and social inclusion 	<ul style="list-style-type: none"> • Flips charts • Felt pens • Laptop • Projector • Participants' • handouts
Review and Close out	Session guide
<p><i>(The facilitator leads the trainees in reviewing the chapter)</i></p> <p>Summary of the main points from the training</p> <ul style="list-style-type: none"> • Objectives and expectations (review done on basis of the objectives and expectations listed earlier) • <i>Trainees to randomly indicate new sets of skills and knowledge learnt from the module. The results are recorded per county presented</i> • Randomly (average of 10 cases) trainees identify key issues for the way forward issues. 	<ul style="list-style-type: none"> • Participants' handouts • Summarize the main points of the module on a flip chart and display

A close-up photograph of a green plant stem, likely a cassava stem, with a yellow tie or bandage wrapped around it. The stem is surrounded by large, green, serrated leaves. The background is a blurred green field.
